IT-INCUBATOR, Minsk
During studying learned following libraries: React, Redux and other
libraries needed for writing clear and readable marketable code.

Power engineer   2010 - 2015
Belarusian National Technical University
Worked for a long time in the power engineering industry on a
managerial position.

PROFILE

Hello, once I decided to change my career and become front-end
developer. I have chosen this profession because I enjoy writing
code. Also I like working in a team since I consider myself to be
sociable and active person. I like to spend my free time improving
my English skills.

MY MAIN PROJECT

Todolist(may 2022 - present)

Todolist app created with react hooks, routing and
redirects, material UI, REST api request/response flow,
unit-tests and etc.
